

LEGAL · DATA PROTECTION

Privacy Policy

What Gurukrupa Powertech Solutions collects, why we collect it, exactly who else sees it, and how you get it back or get it deleted. Written field by field against what this website and our project process actually do — not as a template with our name pasted on top.

 Effective 18 August 2026 Version 2.1 DPDP Act, 2023 No tracking, no ad pixels

THE SHORT VERSION

Four commitments, stated plainly

We never sell your data

Not to lead aggregators, not to other installers, not to financiers, not to anyone. There is no arrangement under which your enquiry is passed on for money or in exchange.

No tracking, no advertising pixels

This site runs no analytics suite, no advertising or retargeting scripts, and sets no tracking cookies. Nobody is following you off this website.

Collected for one purpose

To size your system, file your PGVCL and subsidy applications, and arrange your site visit. Nothing is collected "in case it is useful later".

Deleted on request

Ask us to delete your data and we will, except where tax law or a live warranty obligation requires us to keep a record. We will tell you which applies.

SECTION 1

Who we are, and what this covers

Gurukrupa Powertech Solutions is a solar EPC company based in Madhapar, Bhuj, Kutch, Gujarat, designing and installing On-Grid and Hybrid rooftop systems across the PGVCL area.

Under the Digital Personal Data Protection Act, 2023, we are the **Data Fiduciary** for the personal data described here — meaning we decide why and how it is processed, and we are accountable for it. You are the **Data Principal**.

This policy covers personal data collected through this website **and** through the course of a project — at a site survey, over WhatsApp, and in the PGVCL and subsidy applications we file for you. A policy that covered only the web form would describe a small fraction of what a solar EPC actually handles, and not the important fraction.

It is issued in accordance with the DPDP Act, 2023 and the DPDP Rules, 2025, and the Information Technology Act, 2000 together with the SPDI Rules, 2011.

SECTION 2

What we collect, and where

Every field, grouped by the point at which you give it to us.

Quotation & lead capture	
The quotation tool at /quote — optional lead gate	
Full name	To address you correctly and identify your enquiry
WhatsApp number	The only channel we use to send your estimate and arrange a site visit
City or location	To route the enquiry to the right engineer and check we serve your area

System type requested (On-Grid / Hybrid)	To prepare the right kind of proposal
Electricity bill figures — your peak and off-peak monthly amounts	To size the system against your actual consumption
Appliance list and backup hours, for Hybrid enquiries	To size the battery bank and inverter
The estimate our calculator produced for you	So our engineer sees the same figure you saw

Contact & callback forms

OPTIONAL

The contact form and callback requests across the site

Name	To reply to you
Phone number and email address	To reply to you by the channel you chose
Your message	To answer the question you actually asked

Site survey & project execution

Collected in person or over WhatsApp, only after you engage us

Site address and roof photographs

To design the array and the mounting structure

Consumer number, connection details and a copy of your electricity bill	To verify sanctioned load and phase, and to file the PGVCL application
Proof of ownership, or the owner's no-objection certificate	A mandatory document for the DISCOM and subsidy applications
Identity and address proof as required by the DISCOM and the national portal	Statutory requirement of the application process
Bank account details for the subsidy credit	Submitted to the national portal so the Government can credit the subsidy directly to you. We never take payment from this account and never hold it as a payment instrument
Installation, commissioning and service records, including equipment serial numbers	To operate your warranty and to service the system for its life
Photographs of the completed installation	Project records and quality control, and — unless you decline — our published portfolio. See section 7

Technical & server data

Generated automatically when any website is visited

IP address, browser type, device type and timestamps in server logs	Security, abuse prevention and diagnosing faults. Not used to build a profile of you
--	--

👍 **The lead gate is genuinely optional**

You can run the quotation tool and see your full estimate **without giving us your name or number**. The contact step is there so we can follow up if you want us to — it is not a wall in front of your result, and we have deliberately built it that way.

SECTION 3

What we do not collect, and what your browser stores

The absences are as much a part of this policy as the collections.

This website does not:

- Run Google Analytics or any other analytics suite.
- Load advertising, retargeting or conversion pixels from Meta, Google or any ad network.
- Set tracking or third-party cookies, or share any identifier with an advertising network.
- Embed social media tracking widgets.
- Collect your Aadhaar, PAN or bank details through any form on this website. Where such documents are required for a DISCOM or subsidy application, they are collected directly, offline, only after you have engaged us.
- Take card or payment details on this site. We do not process online payments here.

One thing your browser does store, and we would rather say so

The quotation journey is several steps long, and losing it because you switched tabs would be maddening. So the tool saves your progress — the answers you have given so far — in your own browser's **sessionStorage**. That lets you pick up where you left off.

It is not a cookie, it is not sent to any advertiser, and it is not a tracking identifier. It stays on your device, is readable only by this website, and your browser discards it when you close the tab. Clearing your browser data removes it immediately. We mention it because “we use no cookies” is a technically true sentence that would leave you with a false impression, and that is not how we want to write this page.

SECTION 4

Why we collect it

Each purpose, the data it uses, and the basis on which we process it. We do not use your data for anything not on this list.

PURPOSE	DATA USED	BASIS
Calculating your solar requirement and preparing an estimate	Bill figures, appliance list, backup hours, system type	Your request
Contacting you to arrange a site visit and discuss the proposal	Name, WhatsApp number, city	Your consent at the lead gate
Answering an enquiry you sent us	Contact form fields	Your request
Designing, quoting and executing the installation	Site survey data, connection details	Performance of our contract with you
Filing your PGVCL net metering application	Consumer number, bill copy, ownership and identity documents	Your instruction, and DISCOM requirement
Registering and declaring your PM Surya Ghar subsidy claim	Portal application data, bank account details	Your instruction, and scheme requirement
Registering and pursuing an OEM warranty claim on your behalf	Name, site address, contact number, equipment serial numbers	Performance of our contract with you
Statutory records — invoices, GST and tax records	Name, address, invoice data	Legal obligation
Keeping the website working and secure	Server logs	Our legitimate operational need

We do not use your data for automated decision-making that produces a legal effect on you, and we do not build behavioural profiles. The sizing calculation the quotation tool performs is

a published engineering formula applied to figures you typed in yourself, and a human engineer reviews it before any firm proposal is issued.

SECTION 5

Consent, and taking it back

Where we rely on your consent, you can withdraw it at any time, as easily as you gave it.

Sharing your contact details at the quotation step is voluntary and consent-based. Withdraw that consent by telling us — a WhatsApp message, a phone call or an email to sagarbhimani001@gmail.com is enough. No form, no justification required.

On withdrawal we stop contacting you and delete the lead record, unless a contract is already running between us or the law requires us to retain something. We will tell you which, if either, applies. Withdrawal does not undo processing that was lawful before you withdrew.

Where you have engaged us for an installation, some processing is necessary to perform that contract or to meet a statutory requirement — filing your PGVCL application, or keeping GST invoice records. That processing continues for as long as the contract or the statutory obligation does, and it is not something consent withdrawal can switch off.

SECTION 6

Calls, WhatsApp, SMS — and the DND register

Most companies bury this one. Since telephone and WhatsApp are how we actually reach you, it deserves saying out loud.

When you give us your number — through the quotation tool, a contact form, or during a project — you consent to us contacting you by **phone call, SMS, WhatsApp and email** in connection with that enquiry or project.

That consent expressly extends to contacting you **even if your number is registered under the DND / NCPR preference** maintained under the TRAI Telecom Commercial Communications Customer Preference Regulations, 2018. Without it, a registered number would block the very callback you asked for.

🕒 Scope, and how to switch it off

This consent covers communication **about your own enquiry or your own system** — your estimate, arranging a site visit, application status, service and warranty matters. It is not a subscription to bulk promotional messaging, and we do not add you to any marketing list you did not ask to join.

Withdraw it at any time by replying STOP on WhatsApp, telling the caller, or writing to sagarbhimani001@gmail.com. We will stop. Where a contract is running we may still need to send you essential service notices — a scheduled visit, or a safety matter about your own installation.

We do not share your number with any third party for their own marketing, and we do not buy contact lists. If you receive a promotional message about solar that claims to be from us and you never contacted us, please report it to us — we would want to know.

SECTION 7

Photographs of your installation

We photograph completed installations. Some of those photographs are published on this website, and you get to decide whether yours is one of them.

Photographs of your site are taken and used for three purposes:

- **Project and service records** — the as-built condition of your roof, the array layout and the terminations, which is what lets a technician who has never visited your site diagnose a fault years later.
- **Quality control** — internal review of workmanship.
- **Our published portfolio** — the project gallery on this website, unless you decline.

👁️ What a published photograph does and does not show

Where we publish a photograph of an installation, we do not publish your **name, your full address, your consumer number or your contact details** alongside it. Location is described no more precisely than the town or village.

We are aware that a photograph of a building can identify a household to someone who already knows the area, whatever caption sits under it. That is exactly why the decision is yours rather

than ours.

Your choices, all of which we will honour without asking why:

- **Decline publication** — before, during or after installation. Tell the site engineer or write to us. We will still take record photographs for your project file, because they are needed to service the system; they simply will not be published.
- **Ask for removal** of a photograph already published. We will take it down.
- **Named use requires separate permission.** We will not use your name, a testimonial, a video, or any recognisable identification of you or your family in marketing unless you have specifically agreed to that use.

Requests go to sagarbhimani001@gmail.com or [+91 97259 76717](tel:+919725976717). The same commitment is written into our [Terms & Conditions](#), so it binds us contractually and not merely as a policy statement.

SECTION 8

Who else sees your data

Four categories of recipient, all named. There is no fifth.

PGVCL / your DISCOM, and the PM Surya Ghar national portal

What: Your application documents — connection details, bill copy, ownership and identity proof, and the bank account for the subsidy credit.

When: Only when you have engaged us and instructed us to file. Governed by the DISCOM's and the portal's own terms once submitted.

Equipment manufacturers (Waaree, Adani, UTL, Solaryaan, Polycab and others)

What: Your name, site address, contact number and the affected equipment serial numbers.

When: Only when registering a warranty claim on your behalf, and only the data the manufacturer requires to open the claim.

Our hosting and email service providers

What: Lead and enquiry details pass through, and are stored in, the mail service that delivers our notifications, and the infrastructure that runs this website.

When: Continuously, as a technical necessity of running the site and receiving enquiries. They process on our instruction; they are not permitted to use your data for their own purposes.

Statutory and legal recipients

What: Whatever a specific, lawful demand requires.

When: Where we are required by law, a court, or a regulator, or where it is necessary to establish or defend a legal claim.

What never happens

Your data is **never sold, rented, bartered or licensed**. It is never passed to lead-generation networks, loan or finance brokers, insurance sellers, other solar installers, or any advertising or marketing platform. We do not send marketing on behalf of anyone else, and we do not run a mailing list you did not ask to be on.

Our service providers are located in India or process data on infrastructure accessible internationally. Where any transfer outside India occurs, it is limited to what is necessary to deliver the service, is subject to that provider's contractual commitments, and is made in accordance with the DPDP Act and any restrictions notified by the Central Government.

SECTION 9

Where it is stored, and how long we keep it

An honest description of the actual arrangement, including its limits.

A quotation lead submitted through this website is recorded by our application server and simultaneously sent as a notification email to our own business mailbox, which is where it durably lives and from which our team works it. Contact form enquiries reach us the same way. Access is restricted to authorised Gurukrupa personnel.

Project documents — bills, ownership proof, identity documents, application acknowledgements, commissioning records — are held in our project files, in physical and digital form, restricted to the staff working on your installation and on your after-sales support.

CATEGORY	RETENTION
Enquiries and quotation leads that do not convert	Up to 24 months from last contact, then deleted. Deleted sooner on request.
Project, installation and commissioning records	For the life of the warranty obligations on your system, so that we can support a claim years later.
Subsidy and DISCOM application documents	Until the application is complete and the retention period required by the scheme and the DISCOM has passed.
Invoices, GST and statutory financial records	As long as Indian tax and company law requires. This is not something we can delete on request.
Server logs	Short-term, for security and diagnostics only.

SECTION 10

How we protect it

Reasonable security safeguards, and a plain statement of what they do and do not guarantee.

- All traffic between your browser and this website is encrypted in transit over HTTPS.
- Administrative interfaces are access-controlled and restricted to authorised personnel.
- Access is on a need-to-know basis — the engineer surveying your roof does not need your bank details, and does not have them.
- Physical project files are kept at our office premises with controlled access.

- Documents collected for a DISCOM or subsidy application are used for that application and are not circulated further.

No system is completely secure, and we will not pretend otherwise. If a personal data breach occurs that is likely to affect you, we will notify you and the Data Protection Board of India as required under the DPDP Act and its Rules, with a description of what happened, what data was involved and what you should do.

Two things we will never ask you for

We will never ask for your **banking password, card PIN, CVV, or an OTP** — not by phone, not on WhatsApp, not by email, not ever. The bank details we take for a subsidy application are the account number and IFSC that the Government credits money *into*. If someone claiming to be from Gurukrupa asks you for a credential or an OTP, it is not us. Call us on [**+91 97259 76717**](tel:+919725976717) and tell us.

SECTION 11

Your rights

Under the Digital Personal Data Protection Act, 2023, you have the following rights over your personal data. Exercising any of them is free.

Access

Ask what personal data we hold about you, what we have done with it, and who we have shared it with.

Correction & completion

Have inaccurate or incomplete data corrected, completed or updated. Tell us if your phone number or address changes — a wrong number on a subsidy application costs you weeks.

Erasure

Ask us to delete your personal data, unless we are required to keep it for a legal purpose such as tax and invoice

Withdraw consent

Withdraw consent as easily as you gave it. Tell us to stop contacting you and we

records, or for an active warranty obligation.

will, and we will delete the lead record unless a contract is already running.

Grievance redressal

Raise a complaint with us about how your data has been handled, and receive a response — see section 12.

Nominate

Nominate another person to exercise these rights on your behalf in the event of your death or incapacity.

To exercise any of these, write to sagarbhimani001@gmail.com or call [+91 97259 76717](tel:+919725976717). We may need to verify your identity before acting — usually by confirming details only you would know, such as the number you enquired from. We will respond **within 30 days**, and sooner where we can.

One duty runs the other way: please give us accurate information and do not submit someone else's contact details as your own. A wrong phone number or an incorrectly linked bank account is the most common reason a subsidy claim fails at the last step.

SECTION 12

Grievance redressal

If you are unhappy with how we have handled your data, this is the route.

Contact our Grievance Officer with the details of your complaint. Include your name, your contact number, and what you would like done.

GRIEVANCE OFFICER

The Proprietor, Gurukrupa Powertech Solutions

 sagarbhimani001@gmail.com

 [+91 97259 76717](tel:+919725976717)

 Shop No 22, City Center Complex, Near Nad Circle, Junavas, Madhapar, Bhuj, Gujarat 370001

 9 AM – 7 PM, Mon–Sat

We acknowledge within **2 working days** and aim to resolve within **30 days**. If you remain dissatisfied, you may complain to the **Data Protection Board of India** under the DPDP Act, 2023. Nothing here limits your rights under the Consumer Protection Act, 2019.

SECTION 13

Children

This website and our services are directed at adults.

We do not knowingly collect personal data of anyone under 18. Our quotation tool and enquiry forms are intended to be used by property owners and decision-makers. We do not undertake tracking, behavioural monitoring or targeted advertising directed at children, as prohibited by the DPDP Act.

If you believe a minor has submitted information through this site, tell us at sagarbhimani001@gmail.com and we will delete it promptly.

SECTION 14

Changes to this policy & contact

We update this page when our practices, our systems or the applicable law change.

The effective date and version number at the top reflect the current revision. Where a change materially affects how we handle data you have already given us, we will take reasonable steps to inform you rather than relying on you noticing a date change.

For anything about this policy, your data, or a request to access, correct or delete it:

Gurukrupa Powertech Solutions

Shop No 22, City Center Complex, Near Nad Circle, Junavas, Madhapar, Bhuj, Gujarat 370001

[+91 97259 76717](tel:+919725976717)

 sagarbhimani001@gmail.com

See also our [Terms & Conditions](#), which cover warranties, the PGVCL process and the subsidy.

 Pending advocate review

The collection, sharing and retention statements on this page have been verified against what this website and our project process actually do. The page has not yet been settled by a practising advocate against the DPDP Act, 2023 and its Rules, and will be replaced with a lawyer-reviewed version before final launch.
